SEL PQA Resources

Drawing on research supported by SCE, the Wallace Foundation, Raikes Foundation and several Weikart clients, the Program Quality Assessment (PQA) has been extended to include core content in several domains of social and emotional learning. The revised tool introduces scales in empathy, emotion coaching, problem solving, and mindfulness and pulls higher order thinking items and learning strategy items from the Academic Skill-Building/Summer Learning PQAs. The SEL PQA also reflects more rigorous criteria for some traditional PQA scales. The new tool is applicable to both School Age (grades K-6) and Youth (grades 4-12).

Please note that this tool is currently being piloted and subject to minor revisions. We encourage you to check this page regualrly for updates. We are conducting implementation and validation studies for the SEL PQA and the related youth skills measure, the Staff Rating of Youth Behavior in 2017-2018. For more information about the tools or our related training and technical assistance supports, please contact sel@cypq.org[1].
